

# COAL CORE GENERIC

## SGS QUEENSLAND COAL MINING INDUSTRY GENERIC INDUCTION:

**Our modern training facilities and experienced instructors ensure that graduates of our course leave equipped with the knowledge, confidence and skills required for safe entry into the mining industry.**

### COURSE OUTLINE

The purpose of this course is to introduce the trainee to the legislation, accepted practices and safety procedures that are used on coal mining sites in order to create and maintain a safe and healthy working environment.

Our course is conducted over two days and includes the following topics:

- Legislation
- Fitness for work and general safety
- Work hazards and working at heights
- Risk management & isolation
- Emergency procedures & first aid
- Vehicle operations
- Fire fighting
- The environment
- Work processes

### BENEFITS

- Cost effective two day course
- Nationally Accredited Course
- Course are held frequently at most SGS training locations
- Safer workforce

### APPLICATIONS

The course provides a basis for the further training in site specific, general and operational procedures, and tasks that must occur once the trainee takes up a position in an Open-Cut Coal Mine.

### TECHNICAL ADVANTAGES

Graduates of this course will also receive 2 units of competency, MNMCG1013A-Apply Initial Response First Aid and MNCC1006A-Conduct Local Risk Assessment, in partial completion of the Certificate II in The Mining Industry (MNC04).

### PREREQUISITES

There are no prerequisites required to attend this course. However, the course is itself a prerequisite to working on any Queensland mine site.

### LEGISLATION/COMPLIANCE

Our course is compliant with both the Mining Industry Skills Centre and Mining Industry requirements for working on a Queensland Mine Site.

### LOCATIONS

#### QUEENSLAND:

Brisbane, Mackay, Emerald, Moranbah, Gladstone, Rockhampton

#### NEW SOUTH WALES:
