

PERFORM CPR TRAINING

STAX

SGS CARDIO PULMONARY RESUSCITATION TRAINING

Our modern training facilities and experienced instructors ensure that graduates of our course leave equipped with the knowledge, confidence and skills required for safe CPR.

HLTCPR201A

COURSE OUTLINE

This course is nationally accredited and will be accepted throughout industry in Australia. The course is compliant with the national competencies and the recommendations of the Australian Resuscitation Council (ARC).

Our course is conducted over a two hour period which allows time for students to relax while they watch a theory presentation and practical demonstration from an experienced instructor, followed by an assessment to ensure that they are confident with their knowledge and the ability to perform CPR should the need arise:

The course will include the following topics:

- Current legislation & duty of care
- Respiratory & circulatory systems
- Emergency action principles
- Primary assessments
- Potential hazards and risks of first aid
- CPR delivery according to the ARC
- Responding in a culturally aware manner
- Infection protection and recording vital signs
- Various means of breath delivery and recovery positioning

BENEFITS

- Meets with employers legal obligation to provide trained First Aid Officer at the work place
- Nationally accredited course
- Complies with the ARC
- Cost effective
- Includes CPR and basic life support units of competence

APPLICATIONS

This course provides a basis for further training in First Aid. It also complies with the requirements for CPR awareness within the Electrical Industry.

KEY LEARNING OUTCOMES

- Understanding of relevant legislation
- Basic overview of respiratory & circulatory systems
- Developing emergency action plans
- Risk management and primary assessment
- CPR according to ARC
- Infection protection
