

EFFECTIVE SAFETY FOR SUPERVISORS

STAX

SGS EFFECTIVE SAFETY FOR SUPERVISORS TRAINING

Our modern training facilities and experienced instructors ensure that graduates of our course leave equipped with the knowledge, confidence and skills required for safety management.

MNCC1001B: Work safely

MNCC1005A: Comply with site work systems/procedures

MNCC1006B: Conduct local risk assessment

COURSE OUTLINE

The purpose of this program is to provide frontline supervisors with the relevant skills and knowledge to be able to communicate the objectives of your company's safety management system within the mining industry. This program completes some of the competency units required for Certificate II in The Mining Industry (MNC04).

Our program is conducted over two days and includes the following topics:

- Work safely
- Access and identify the site safety procedures
- Apply personal safety measures
- Identify and report incidents
- Comply with site work systems/procedures
- Plan and prepare for quality outcomes
- Apply work procedures to individual work activities
- Conduct local risk assessment
- Identify hazards

- Assess risk and identify unacceptable risk
- Identify, analyse and implement risk treatments

BENEFITS

- Mining industry approved course
- Cost effective two day course
- Safer workforce

APPLICATIONS

This course provides a basis for further training in site specific general and operational procedures and tasks that must occur once the successful graduate takes up a position within the mining industry. Graduates will also be able to understand why a clearly defined accountability Safety Management System is the mechanism to make sure that employees fulfil their assigned responsibilities.

PREREQUISITES

There are no prerequisites for these competency units.

TECHNICAL ADVANTAGES

- A concise, practical course defining the supervisor's role in developing an effective safety culture
- Demonstration, group activities, simulations, problem solving
- 2 days (9 hrs each).
- Courses are held frequently at most SGS training locations

ASSESSMENT

Evidence gathering techniques include:

- Oral and Written questions, multiple choice
- Completion of simulated workplace documentation

Small group activities, simulations, demonstrations

LOCATIONS

Australia wide. Please call to find your closest training facility.

SGS OFFERS

SGS provides a variety of industry based and generic OH&S training programs including:

- Mining and Industry Safety Inductions
- Competency Based Training Programs
- OH&S Assessment and Auditing
- OH&S Training and Qualification
