

# WORK SAFELY AT HEIGHTS

## STAX

### SGS WORK SAFELY AT HEIGHTS

Our modern training facilities and experienced instructors ensure that graduates of our course leave equipped with the knowledge, confidence and skills required for safe work at heights.

RIIOHS204A

### COURSE OUTLINE

This nationally accredited one day course, is accepted throughout industry and mining within Australia. The course is compliant with both the NSW and QLD OH&S regulations and AS/NZS 1891 – the Australian Standard for Working at Heights and covers the following areas:

- Definitions
- Current legislation
- Duty of care in relation to working at heights
- Definition of working at heights
- Potential hazards and risks
- Identifying additional risks
- Risk management including completing a JSA and a permit
- Duties of the safety observer
- Safe work at heights physical and psychological requirements
- Equipment requirements
- Fall restraint & fall arrest systems
- Ladders, EWPs, and scaffolds
- PPE requirements
- Using rescue equipment
- Practical rope rescue session

### BENEFITS

- Nationally Accredited Course
- Cost effective one day course
- Metalliferous Mining
- Applicable to all facets of mining and industry
- Compliant with both OH&S and Mining
- Legislation

### APPLICATIONS

This unit specifies the competency required to undertake safe working practices when working at heights or depths.

### TECHNICAL ADVANTAGES

It is expected that all persons working at heights and the standby person will be competent to do so and will also be trained in incident response.

### PREREQUISITES

There are no prerequisites for these competency units.

### LEGISLATION AND COMPLIANCE

Working Safely at Heights meets with the requirements of RIIOHS204A and is in partial completion of RIIO Resources & Infrastructure Training Package. Partially meets with the requirements of The Coal Mining Safety and Health Regulation Section 92 for controlling risk associated with working at heights.

### LOCATIONS
